High Temperature Sensor 4-20mA
TE-FG420

Description:

High Temperature Immersion Sensor complete with Stainless Steel Pocket.

Features:

- IP65 Enclosure
- 4-20mA Loop Powered
- Robust Metal Sensor Housing

Technical Specification:

Protection:	IP65
Sensing Element:	Pt100a
Termination:	Screw Clamp.
Temperature Scaling:	-50 to 200°C Range (specified when ordering)

Dimensions...

|	
Probe:	150 x 6mm
Process Fitting:	1/2" BSP
Cable Length:	1 Meter

Order Codes:

TE-FG420   High Temperature Sensor 4-20mA

Installation:

1. Disconnect power before carrying out any wiring on the Sensor.
2. Remove the cover, Wire 24Vdc to + and - terminal,
3. Maximum Wire size 2.5mm² take care not to over tighten the terminal screws.
4. Follow the wiring diagram below.

Wiring:

-   **+**

24Vdc Supply
